GET TO KNOW OUR PROCEDURE

ULTIMATE SLIMMING EXPERIENCE

JULY

2025

A woman is lying on her back on a white massage table. A therapist's hands are visible, one on her upper leg and the other on her lower leg. The background is a dark, textured wall.

WHAT'S LIPO CAVITATION

Lipo Cavitation is a non-invasive treatment that uses ultrasound waves to break down fat cells into glycerol and fatty acids. Glycerol is absorbed for energy, while fatty acids are eliminated through urination and sweating, leading to increased sweating and urination post-treatment as part of the detoxification process.

3 CONTOUR STEPS

- Fat Cavitation – Targets and breaks down fat cells using advanced ultrasound technology.
- Radio Frequency (RF) – Stimulates collagen production, enhances lymphatic drainage, and improves skin firmness, helping reduce the appearance of sagging.
- Mini Maderotherapy – Encourages deeper lymphatic circulation, accelerates fat breakdown, and promotes faster flushing of waste from the body.

FACIALS & LASERS

ULTIMATE PICK-UP SESSION

2025

HydraSilk Luminous

HydraSilk Luminance is a **13-step skin purification ritual** designed to revive dull, tired skin and reveal a fresh, luminous complexion. This indulgent treatment deeply detoxifies, exfoliates, and hydrates—leaving your skin baby-soft, visibly clearer, and radiantly renewed.

Perfect for monthly maintenance or a pre-event glow, it's more than a facial—it's your skin's reset button, delivered with elegance and care.

~~IDR 300.000~~ **IDR 225.000**

Carbon Laser Peel

A high-performance skin rejuvenation treatment using ND:YAG laser technology and a purifying carbon mask to deeply cleanse, refine, and illuminate the skin. As the laser zaps away the carbon, it lifts impurities, unclogs pores, and smooths texture—revealing a fresh, radiant glow with no downtime.

The ultimate pick-me-up for dull, tired skin—refined, effortless, and undeniably luminous.

~~IDR 375.000~~ **IDR 275.000**

Luminous Underarm Ritual

comprehensive treatment designed to restore clarity, smoothness, and confidence to one of the most delicate and often overlooked areas of the body—your underarms.

This premium three-step experience begins with a peeling session, tailored to gently exfoliate dead skin cells, smooth uneven texture, and prepare the skin for maximum absorption of active ingredients.

Next, we target underarm pigmentation using our state-of-the-art ND:YAG laser, known for its precision and safety on sensitive areas. The laser energy penetrates deep into the skin to break down excess melanin, fade dark spots, and stimulate a more even, radiant tone. This step is key in addressing years of discoloration caused by friction, shaving, or product buildup—restoring clarity and luminosity.

The final step is a gentle yet effective laser hair removal session, which zaps away unwanted hair follicles with precision. This not only minimizes regrowth over time but also reduces pore congestion and shadowing, leaving the underarms visibly smoother and softer to the touch.
